a Shared memory ceiling
Available RAM
Weights
Retained KV
Workspace
Weight bits ↓: capacity released
Longer context: KV traffic grows
Test quality + peak RAM + latency
b Contended execution resources
Draft
Verify
Offload
Compute + memory + link
Acceptance, switching and transfers
change the net benefit.
Test the combined critical path
c Workflow amplification
Model
Tool
State
Depth / retries
More calls add model, tool
and communication work.
Test success + failed actions
